

YOUR EXPERT **PARTNER**
FROM **DESIGN** TO **DELIVERY**

 **ACE** Winches

Our People.
Your Solution.

WHAT CAN WE DO FOR YOU?

Our people are uniquely positioned to provide your **innovative solution** across our **engineering, manufacturing** and **rental services**

EARLY ENGAGEMENT

Creating value for our clients through active involvement in concept and planning phases

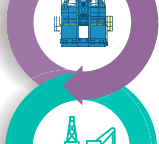

ENGINEERING EXCELLENCE

Detailed design and engineering by our experienced personnel to deliver the best solution

MANUFACTURING & TESTING

Safe, high quality in-house services delivered on time

RELIABLE RENTAL ASSETS

Combining our expert people and large fleet of rental equipment to support your entire project solution.

INSTALLATION, COMMISSIONING & OPERATION

24/7 dedicated field support to achieve greater efficiency and reduced start-up costs

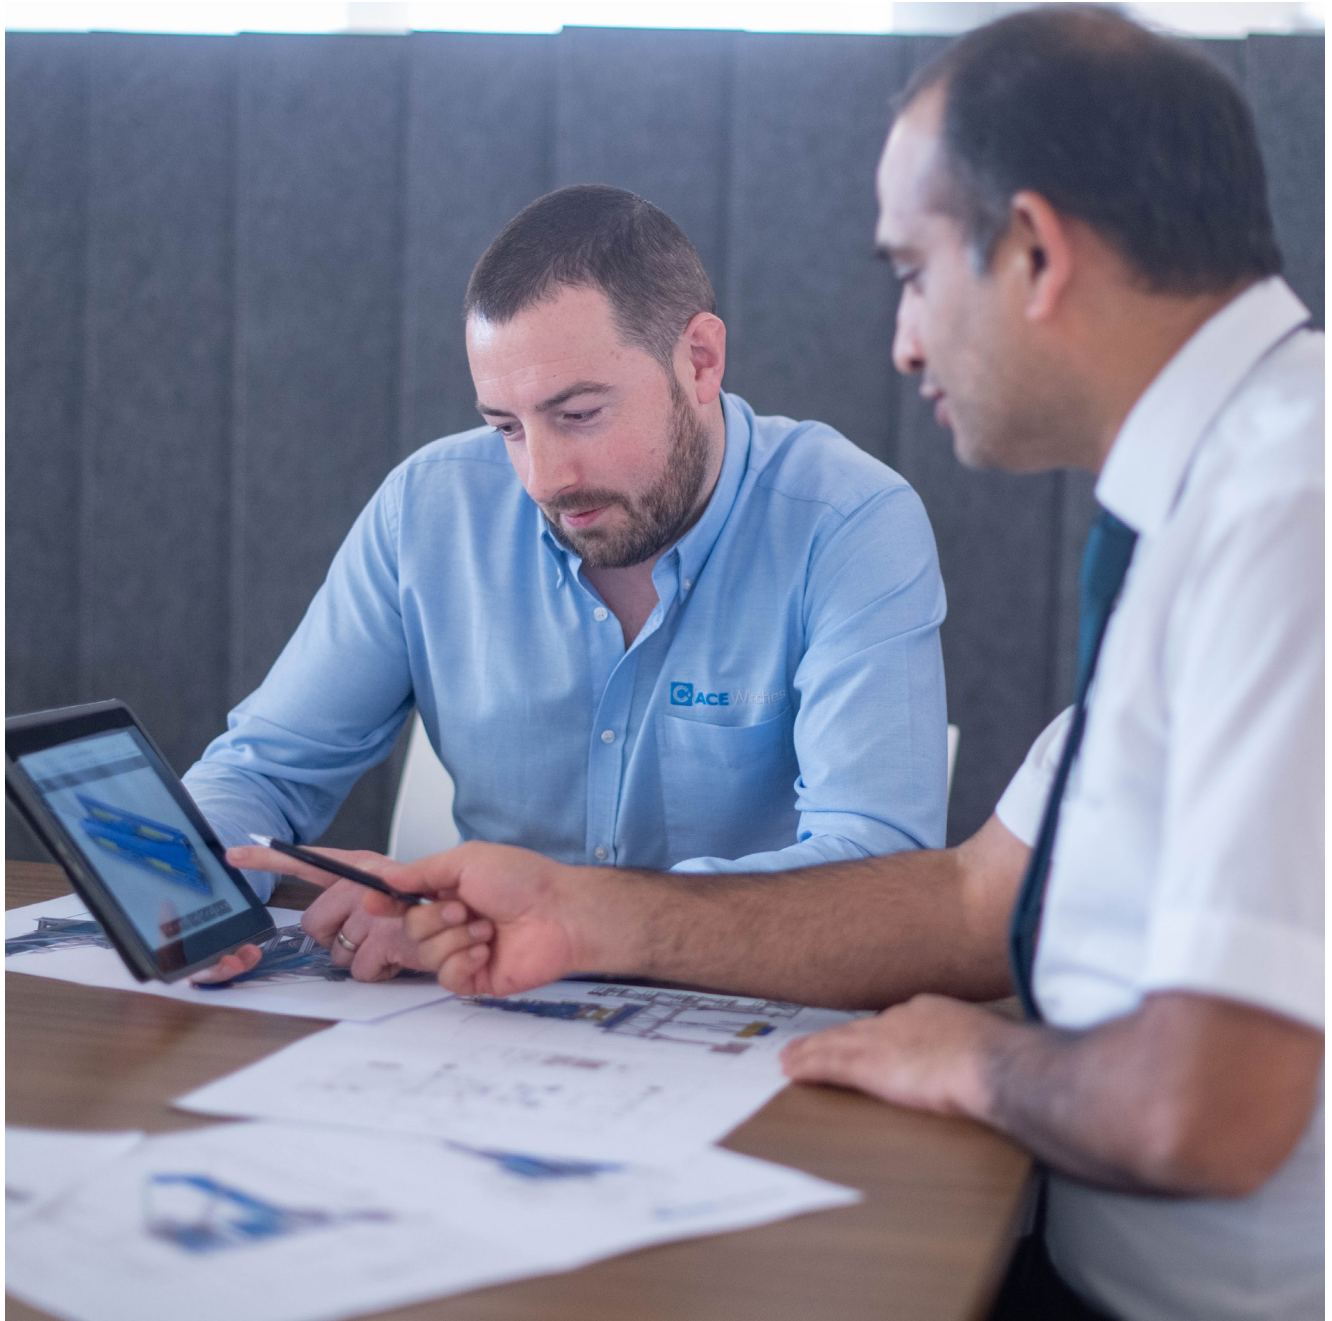

MAINTAIN & TRAIN

Cost and risk management through specialised equipment maintenance and personnel training

Our People. Your Solution.

EARLY ENGAGEMENT

Creating value for our clients through active involvement in concept and planning phases

With our industry leading knowledge and expertise, we are ready to collaborate with you and provide effective, value-driven front end studies and engineering solutions.

Our in-house experienced design and engineering division utilises the latest technology and software to develop new concepts and bring innovative and sustainable solutions to life.

Our flexible approach, along with our range of engineering capabilities allows us provide creative solutions to a wide range of markets and industries.

We are a team built around your needs.

Our People. Your Solution.

ENGINEERING EXCELLENCE

Detailed design and engineering by our experienced personnel to deliver to the best solution

Our design and engineering team has a proud history of creating and developing world leading concept and solutions. Our culture of innovation through design and our dedication to continuous improvement allows us to deliver the best engineering solution.

Solving challenges is at the core of our business and our partners and clients trust that we will always drive change and challenge industry practices.

Our client-focused teams can assist with a diverse range of engineering solutions from basic concepts to detailed engineering analysis. We can provide a full range of services including front end engineering and design, structural and mechanical engineering, subsea installation procedures, project management as well as hydraulic and electronic control systems.

All of our project engineering works are expertly managed by our own people.

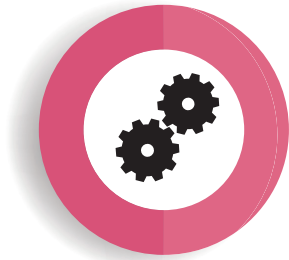

Our People. Your Solution.

MANUFACTURING AND TESTING

Safe, high quality in-house services delivered on time

We are an original equipment manufacturer with a proven track record of successful delivery spanning over 25 years.

Our modern, world-class manufacturing facilities are powered by renewable energy which allows us to deliver safe and sustainable solutions whilst reducing our impact on the environment.

We are passionate about delivering outstanding, reliable solutions that meet cost, schedule and quality targets. Our investment in our people, technology and facilities means we are capable of providing 24/7 support to your project.

All our equipment is CE marked as standard and is designed and manufactured in compliance with industry certification as required by our clients.

Our purpose built testing centre enables us to replicate on site project configurations and offer a complete solution from design to delivery.

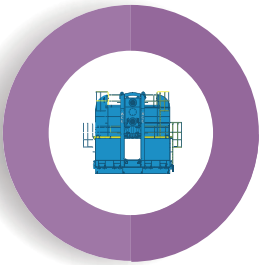

Our People. Your Solution.

RELIABLE RENTAL ASSETS

Combining our expert people and large fleet of rental equipment to support your entire project solution

We are proud to have one of most comprehensive and diverse ranges of deck machinery equipment in our industry. Our responsive and professional teams can quickly mobilise unique packages that suit our clients requirements to any location globally.

Our fleet of specialist rental equipment allows us to deliver reliable and competitive solutions to projects of all sizes and complexity.

All our equipment is subject to rigorous testing and conforms to relative EU and International Safety Directives.

Our highly experienced project management teams can support operations and provide our clients and partners with a single interface to ensure seamless execution.

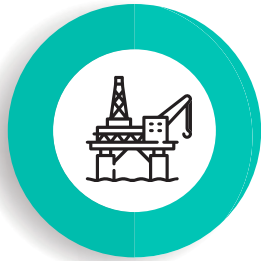

Our People. Your Solution.

INSTALLATION, COMMISSIONING AND OPERATION

24/7 dedicated field support to achieve greater efficiency and reduced start-up costs

Our multi-disciplined offshore personnel team have decades of experience and hold full offshore safety survival certification as a minimum. We are trained and equipped to operate across a range of markets and sectors in all lifting, pulling and deploying applications.

We have the skills, technology and resources to successfully deliver the most challenging and complex projects. Our unique end-to-end project approach allows us to fully support projects onshore, offshore and in remote locations.

Our clients choose to partner with us and trust that our people will deliver safe and efficient support throughout all stages of project installation, commissioning and operation.

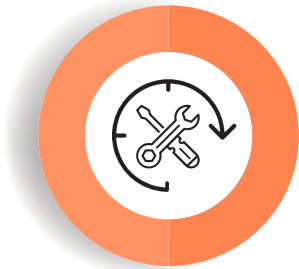

Our integrated approach allows us to be there every step of the way leading to a quality, safe and timely execution of your project.

Our People. Your Solution.

MAINTAIN AND TRAIN

Cost and risk management through specialised equipment maintenance and personnel training

Our Service division offers maintenance contracts, upgrades and commissioning services for our clients who require the overhaul of existing winching equipment and deck machinery whether originally supplied by ACE Winches or any third party.

Our Service offering:

- Offsite Commissioning
- Reverse Engineering
- Feasibility Studies
- FMECA and Engineering Surveys
- Product Support
- Product Upgrades
- Equipment Overhauls
- Survey Technical Support
- Global Service Contracts
- Master Service Agreements
- PLC and Electrical Troubleshooting
- Hydraulic Servicing
- Equipment Repairs

Our Winch Academy provides training for all aspects of winch and spooling operations as well as a variety of associated training programmes and competence management systems. The ACE Winch Academy offers a series of core courses and bespoke services to meet our client's needs, all of which can be delivered at the ACE Winch Academy or at our client's operational site.
